Summary

I am a full stack developer with experience in JavaScript, React.js, Node.js and more! As a tech enthusiast, my journey began early in life as a tinkerer of toys, tools and electronics. This childhood passion grew and evolved into a job in construction then IT and software development. Attention to detail is a core value of mine when building anything from a React app to a retaining wall. My passions exist in the natural world and I hope to use the tech platform to help preserve the natural beauty around us. Through tech and tinkering we can make the world a better place!

Employment

Gibson Development
Software Developer

Working with private construction company Timberline Inc. to design, implement and build web solutions to create and online presence. Walking them through the software development process from the ground up to create solutions that meet the client's goals.

Velocitrackers
Software Developer

Develop track and trace solutions for one of the most demanding shipping markets. Building software that allows companies to keep tabs on their offshore shipments.

Christy Sports
Rental Tech

Managed IT related tasks including online orders, to streamline the ski/snowboard rental process for both customers and employees.

Projects

Gibson Development - Timberline Inc.   July 2020 to Current
- Timberline Inc. is a local construction company based in Santa Fe, New Mexico.
- After 30 years of business, Timberline needs an online presence.
- Tech includes React.js, TypeScript, React Router, Node.js, SCSS, Jest, Enzyme, TravisCI, Heroku.
- Timberline is an informational page that provides the user basic and contact information for Timberline Inc.

Velocitrackers   Aug. 2020 to Dec. 2020
- Velocitrackers is a company that provides track and trace solutions for off-shore shipping.
- I have been added to the team to implement new features, improve testing and TypeScript
- Tech includes TypeScript, GrapgQL, React Testing Library, React.js.
- Full production level application being used by clients in the Gulf.

Nasa Final   Jan. 2010 to Jan. 2019
- Nasa Final is an application that consumes the Nasa Photo of the day API.
- Individual project that was completed in a 48 hour or less deadline.
- The tech includes Vue.js, SCSS, Nasa API, eslint.
- Nasa Final resulted in a simple, functional application that allows a user to see and learn new things about space!
- As a developer learning and implementing new tech within a specific deadline was the primary focus.

Education

Turing School of Software and Design   Apr. 2019 to Jan. 2020
Software Engineer

Began Software Development career taking a progressive approach building applications in vanilla JavaScript, working through jQuery, React.js, Node.js. 9 Months, 2,000+ hours and over 30 projects completed.

Whittier College   Jan. 2016 to Mar. 2017
Studied Business Administration, worked in the IT department to hone my tech skills all while playing colligate varsity level Soccer.
